

BRALIZ STEP BY STEP TREATMENT GUIDE

Before Braliz

After Braliz

Step 1

Wash the hair with Braliz shampoo or a clarifying shampoo, do not use a conditioner

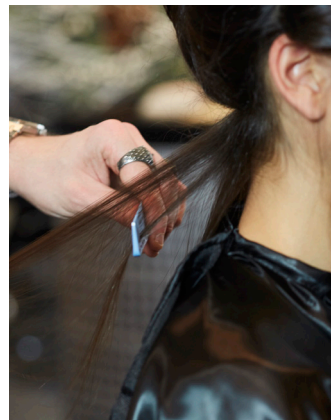

Step 6

Dry the hair with a hairdryer, a brush can also be used

Step 2

Thoroughly dry the hair with a hairdryer

Step 7

Separate the dried hair into thin sections and apply the straighteners to each section 8 to 10 times, 3 passes on the root area and then 7 root to tip passes in a consistent and slow manner

Step 3

Apply Braliz to thin sections of dry hair, and comb through so that each strand is evenly saturated

- For fine to medium hair, natural, colour treated or bleached - use a temperature between 180°C to 200°C

- For medium to thick hair, natural, colour treated or bleached - use a temperature between 200°C and 230°C

Step 4

The client can then relax for 40 to 60 minutes while the treatment gets to work;

- For fine to medium hair, natural, colour treated or bleached - let it act for 40 minutes
- For medium to thick hair, natural, colour treated or bleached - let it act for 60 minutes

Step 8

Hair can immediately be washed and a colour service using up to 6% peroxide can be carried out on the same day if required.

Step 5

Rinse well after the recommended action time, you will be able to feel the treatment rinsing from the hair, do not use shampoo or conditioner but it is important to the effect of the treatment that it is well rinsed from the hair

Braliz Home Care

To prolong the effects of the Braliz treatment, we recommend using the three-step Braliz home care range;

1. Shampoo
2. Conditioner
3. Leave-in spray

To experience the best results, use a hair dryer to reactive the thermo properties of the Braliz treatment, this will leave the hair silky, smooth and shiny.
